

3D Calculator CD ROM for the Perspective Drawing Boards

Did you realise that you can easily draw your perspective to scale or in proportion?

You can buy using the specially prepared Calculator, which is available on a CD-ROM that you can easily install on your PC computer.

[unfortunately, it is not available for Mac users] Once installed all you need to do is:

- indicate whether it is a 'eye-level or 'birds-eye' drawing board,
- whether you are drawing on A4 or A3 paper, or other medium.
- then nominate the length of each axis required in 'real life'. It will calculate the length of each line to be drawn on your drawing board.

Please ensure your details are clear and correct, write in **BLACK PEN** and **PRINT** in **CAPITALS**.

Item Description	Qty	Price (inc. GST)	Postage (per item)	Sub Total
